JÉRÔME ILLAT / SELECTED WORK

Bō — Art of Bonsai

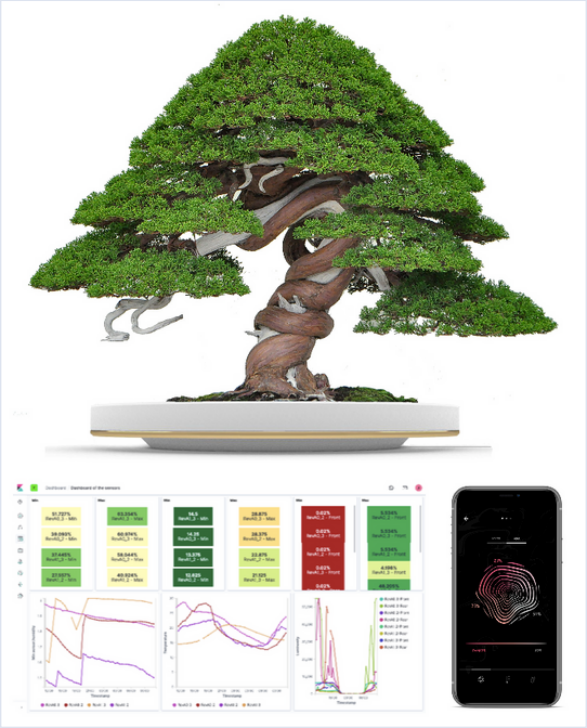

Founder & CEO | 2018–2020

RECOGNITION OF THE PRODUCT / VENTURE

2018 Prix de l'Excellence Française — recognition for Bō

THE VENTURE

I built a startup combining bonsai craft, connected pots, sensor data and machine learning to support tree care through a distinctive physical and digital experience.

WHAT I LED

Founded the company, set the product vision and brought together expertise in horticulture, hardware, data, software and premium service.

Worked with investors and directed the venture's technology and commercial development in an early-stage environment.

WHY IT MATTERS

Hands-on founder experience: forming a proposition, managing uncertainty and trade-offs, and aligning people around a product with both physical and software components.

SCOPE

From concept to implementation, Bō combined a physical product, data platform, mobile experience and an investor-backed venture.

PRODUCT TECHNOLOGY STACK

Sigfox-connected sensors · AWS · Elasticsearch / ELK · Elastic ML · Kibana

SELECTED INVESTORS

Charles-Édouard Bouée
AI Capital Managing Director, former Roland Berger CEO

Anne Lauvergeon
ALP CEO, former Areva CEO

Ludovic Le Moan
Co-founder and former CEO, Sigfox

Christophe Lambert
Actor
